Our Products

Toughened Switchable Smart Glass

Toughened switchable glass is a single toughened glazed glass coated with the PDLC layer, with various thicknesses and colors for choice. It’s a most popular switchable solution with cost-effective features, switched clear to opaque on demand. It is ideal for windows, doors, partitions, and projection screen.

Laminated Switchable Smart Glass

Laminated Switchable Smart Glass incorporating with switchable glass technology is a versatile solution. It may be employed in partitions, windows, skylights, doors, and even function a wonderful HD projection screen.

Switchable Smart Glass Double Glazing

Insulated Switchable Smart Glass is a kind of double glazed units(DGUs) incorporating switchable glass technology which is an energy-efficient solution. It is ideally applied for architect and interior design.
Self-Adhesive Switchable Film

The self-adhesive smart film is an innovative product based on PDLC technology, with a simple switch, the film transferring from clear (transparent) to frosted (opaque). It is manufactured with a static cling layer, peel, and stick, which is easy to install on any window and doors. No specialist installation equipment is required. Providing privacy and security for windows and glass, it is often used as an electric blind.

Lamination Switchable Film

Switchable Smart Film for lamination (also referred as Non-Adhesive switchable smart film) is mainly used for manufacturing switchable glass, also can be stick on any existing glass with special glue.
Our Products

Switchable Smart Glass Projection Screen

Switchable glass equipped with a projector, will not be just a glass, but a projection screen to provide video image on your glass wall. Dim or switch the glass to frosting state, turn on the projector. That's how a switchable smart glass projection screen is connected.
